# LAWN GRASS SEED

## ELLIOTT'S CENTRAL PARK MIXTURE.

We are the original introducers of the above brand of LAWN GRASS SEED, and with nearly FIFTY YEARS EXPERIENCE and a constantly increasing demand for the CENTRAL PARK MIXTURE, we claim it to be the **CLEANEST AND BEST LAWN SEED EVER OFFERED**

**Price: Peck, \$1.00; measured Bushel (about 20 lbs.), \$3.50; 100 lbs., \$15.50.**

## FRENCH OR EMERALD LAWN GRASS SEED.

[SECOND QUALITY.]

We put up this mixture to supply the demand for a cheaper grade than our Central Park Brand. This mixture is equal to any offered at the price, but we do not recommend it where the best results are wanted. **Price, per Peck, 75 Cents; Bushel, (about 16 lbs.), \$2.50.**

## ELLIOTT'S "TERRACE" MIXTURE.

A special combination of grasses that produce strong spreading roots. Such varieties as will succeed in shallow soils, and withstand draught. We recommend the above for sowing on terraces, embankments and similar locations, where it will produce and maintain a rich green turf throughout the season. **Price, per Peck, \$1.25; Bushel, \$4.50.**

# FLOWER SEEDS,

IN LITHOGRAPHED PACKAGES FOR COUNTER TRADE.

(For Prices See Page 12).

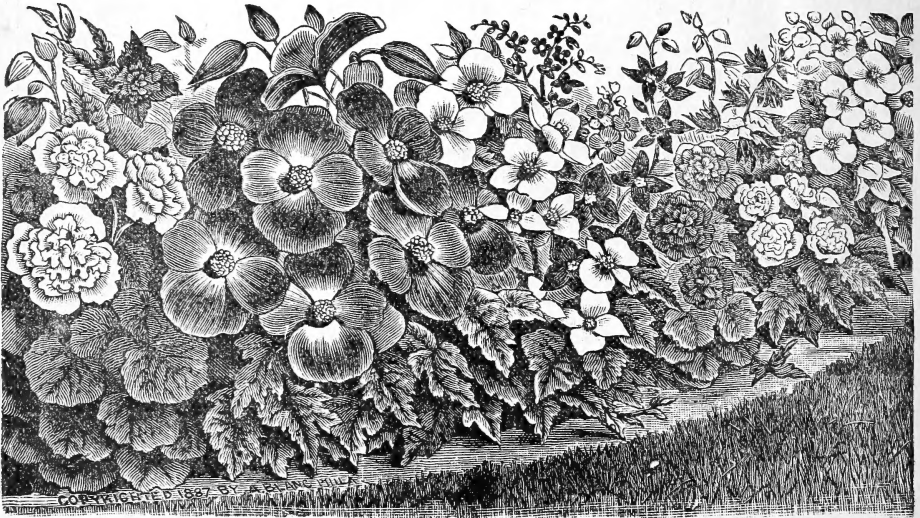

The cut herewith is a photo-engraving of the elegant blue-covered, hinged boxes which we furnish gratis to purchases of our packet Flower Seeds.

We will send this box and 100 packages assorted seeds postpaid by mail, at prices named on page 12, and more can be ordered by mail, as wanted. We will also include with all first orders and without extra charge, a finely executed lithograph of flowers (size 17x25), printed in 10 colors. This will make an attractive advertisement and a real ornament in any salesroom.

# Bulbs for Spring Planting.

## TUBEROUS ROOTED BEGONIAS.

OUR STRAIN OF BEGONIAS IS UNEXCELLED.

# THE MULTIJECTOR.

(PATENT APPLIED FOR.)

For Glazing Greenhouses, Skylights, etc., with Putty; Filling Cracks in Floors; Lubricating Heavy Wagons and Machinery with Lard and Plumbago; Filling the Seams in Decks of Vessels; Pointing around Chimneys on Roofs, etc., with Thick Paint.

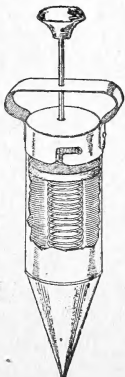

MANY OTHER USES WILL READILY SUGGEST THEMSELVES.

The advantages the Multijector has over everything in the market is that it keeps the material constantly stirred while in use and it cannot rot or soften like a rubber bulb. It is therefore the CHEAPEST article as well as the best.

PRICE, \$2.00.

**DIRECTIONS FOR USE.** Mix the material to about the consistency of lard or very thick cream, and strain through common fly or mosquito wire netting. Remove the cap by the bayonet joint. Rest the point of the Multijector on something so that the material does not flow out, and fill the cylinder nearly full. Replace the cap and see that it is properly fastened. Insert the fingers in the handle and press the knob with the palm of the hand, when the material will issue in a smooth steady stream. The spring inside the cylinder keeps the material well mixed up when working and also stops the flow instantly the pressure is released.

# MUSHROOMS.

The growing of mushrooms for the market is comparatively a new industry, and is meeting with more or less success, throughout the country.

The demands for these succulents are on the increase each year.

They are easy of culture, needing only a temperature of from 55 to 65 and can be grown successfully under greenhouse benches, in cellars or houses built for the purpose.

Above is a good illustration of a bed grown from our Celebrated Milltrack Spawn.
